Sherab Gyaltzen Rinpoche
Visit of University clinic Hamburg-Eppendorf UKE

Welcome of Sherab Gyaltzen Rinpoche by the doctors and assistants of the UKE. Rinpoche offers his book on *Loveful Eyes* and Lama Oles book „How the things are“. After that happens a personal and private dialog about buddhism with the doctors and patients.

The UKE invited Rinpoche to a profound preventive health check.

After the successful check up Rinpoche gave medicine buddhas to the doctors. Rinpoche agreed doing the next check in five years. He was very impressed about the enormous work the workers of the clinic doing. He thanks them very for their engagement to benefit the people and he said, also on the buddhist point of view it is a big expression of compassion. The perspective for the future is very interesting. Intended is a dialog between science and buddhism with our Lamas and the professors of the UKE.

In the evening he gave teachings about cause and effect also in Hamburg. It was organized by our Diamondway center Hamburg.

We thank to all participants for the successful day. Pia and Peter Cerveny – Karmapas Healthcare Project
